Various efforts have been put forth over the past decades to create a universal collection of all the treaties of the world. We have created a solution. Now for the first time, through the cooperation of Tufts University, Brill Publishing, the United Nations, and various others, you will be able to search across all the major treaty publications in the world in one database. We are pleased to present HeinOnline's World Treaty Library.

This monumental collection brings together works from Rohn, Dumont, Wiktor, and Martens to create the richest collection of world treaties ever available, covering the time period from 1648 to the present. More than 180,000 treaty records have been identified.

Through in-depth indexing of all treaties and cross-citation linking, we have created a powerhouse search tool. Use it to locate treaties using such fields as keyword, country, treaty number, treaty type, party, subject, and many more!

“Overall, [HeinOnline’s World Treaty Library] makes treaty research so much easier. ... HeinOnline has solved the problem of having to search one place for treaties to which the U.S. is a party and another for non-U.S. treaties.”
